

## Stealth Wing

This plane is an advanced design. With careful folding, it will reward you with long smooth glides. Launch gently from high above your head or an elevated area.

Orient the template with the “UP” arrow at the top of the page. Then, flip the paper over onto its backside, so that you cannot see any of the fold lines.

Fold the top right corner down and to the left until fold line 1 appears and crease along the dotted line.

Unfold the fold you just created.

Repeat the procedure above by folding the top left corner down and to the right. Make a crease along fold line 2.

Unfold the fold you just created.

This step is a bit tricky. Lift the left and right edges of the paper and push them toward each other while folding the top triangle onto the bottom one. This will make a crease along fold line 3 so that you end up with the shape below.

This is the shape you should have after completing the step above.

Fold the right side over onto the left side along fold line 4. Cut along the dotted cut line 5.

Unfold to produce this shape.

Fold the top point over and crease along fold line 6. Tuck the nose into the slit you cut along cut line 5.

Flip the paper over and fold the nose up along fold line 7.

Flip the paper back over again. Fold the top layer of the triangle shaped flaps in along the vertical fold line 8.

Tuck the flaps into the pockets near the nose of the plane. Push the flaps completely into the pockets.

You should now see this shape. Locate the crease below cut line 5. Pull this crease toward you while also folding the plane in half toward you. This will create creases along fold lines 9.

Partially unfold the fold you just created. You should see this shape.

Fold down the winglets along fold lines 10. Now you are ready to fly! Hold the plane with your thumb against the nose and your index and middle finger behind cut line 5. Launch very gently from above your head.
